# Fnu Abhijith

Memphis, TN, USA |Open to Relocation | fnuabhijith09@gmail.com | +1 901-608-5970 | LinkedIn | GitHub | Portfolio

## PROFESSIONAL SUMMARY

Data Scientist with 4.5+ years of experience developing data-driven BI solutions, automating analytical workflows, and partnering with business, engineering, finance, and operations teams to translate complex needs into scalable analytics capabilities. Proven ability to define KPIs, manage end-to-end analytics projects, and communicate findings through compelling visualizations to both technical and non-technical decision-makers. Skilled in SQL, Python, Power BI, and ETL processes with hands-on experience in demand forecasting, data warehousing, and process automation aligned to modern data stack.

## SKILLS

**Programming & Analytics:** Python (Pandas, NumPy, Scikit-learn), SQL, PostgreSQL, Excel (Advanced)
**BI & Visualization:** Power BI, Tableau, Power Automate, dashboards, data storytelling
**Data Engineering:** ETL pipelines, data warehousing, Azure Data Factory, Azure Synapse, data integration
**ML & Analytics Methods:** Demand forecasting, regression, clustering, A/B testing, optimization, machine learning
**Tools & Platforms:** AWS, Azure, Git, Microsoft M365, Power Automate

## EXPERIENCE

**AI R&D Intern | Biomedical Sensors & Systems Lab, University of Memphis** **Feb 2026 – Present**

- **Preprocessing and analyzing** biomedical datasets to support data quality and pipeline development.
- **Managing code repositories** using Git to maintain version control and collaborative development standards.

**Data Scientist | Cognizant** **Sep 2020 - Dec 2023**

- **Developed and implemented data-driven BI solutions** addressing business needs across operations, finance, and marketing teams, establishing scalable analytics capabilities consumed by 20+ senior stakeholders.
- **Partnered with business, engineering, and finance stakeholders** to define KPIs, translate business needs into technical requirements, and manage end-to-end execution of high-impact analytics projects across 5+ domains.
- **Applied advanced analytical methods** including regression, forecasting, and machine learning to generate actionable insights, surfacing 3+ optimization opportunities per quarter that directly improved decision-making.
- **Simplified, rationalized, and automated 15+ data processes** using Python and SQL, cutting manual reporting time by 60% and creating durable, scalable data foundations across production environments.
- **Built Power BI dashboards and scorecards** with strong data visualization and storytelling capabilities, communicating complex analytical findings clearly to both technical and non-technical decision-makers across 4 business units.
- **Collaborated with operations teams** to understand business needs, develop demand forecasting models, and deploy data-driven solutions that improved planning accuracy and reduced reporting inconsistencies by 40%.
- **Managed ETL processes and data integration workflows** across large-scale datasets, improving data completeness by 30% and ensuring consistent, reliable inputs for downstream BI and analytics systems.
- **Influenced technical and non-technical partners** across all organizational levels through effective verbal, written, and visual communication, driving alignment on project goals and analytics priorities.

**Data Analyst | Boven Technologies** **Jul 2019 - Aug 2020**

- **Developed BI dashboards and automated reporting solutions** tracking operational KPIs across 3 business lines, reducing manual reporting effort by 50% and enabling faster data-driven decision-making.
- **Partnered with cross-functional stakeholders** to gather business requirements, define analytical scope, and deliver scalable data solutions contributing to a 15% improvement in reporting accuracy.
- **Applied data visualization and storytelling techniques** to communicate findings clearly to both technical and non-technical audiences, supporting informed decision-making across business and operations teams.

## EDUCATION

University of Memphis, **Master of Science in Data Science** **Dec 2025**
