PROFESSIONAL SUMMARY

Data professional with 4.5+ years of experience building machine learning and data-driven solutions, recently expanding into Generative AI systems, including LLMs, RAG pipelines, and agent-based architectures. Proven ability to implement **RAG systems, Text-to-SQL, chatbot solutions, and agentic AI workflows** using **Python, LLMs, PyTorch, TensorFlow,** and **cloud AI platforms.** Skilled in **data pipeline development, feature engineering,** and **cross-functional collaboration** to translate complex business requirements into scalable GenAI solutions.

EDUCATION

University of Memphis, **Master of Science in Data Science** **Jan 2024 - Dec 2025**
Coursework: Generative AI, LLMs, RAG, Agentic AI, PyTorch, TensorFlow, Machine Learning, SQL & ETL, Data Pipelines, Feature Engineering

EXPERIENCE

Biomedical Sensors & Systems Lab, University of Memphis
AI Research & Development Intern **Feb 2026 – Present**

- Researching and prototyping **Agentic AI and LLM-based healthcare systems**, analyzing multi-agent architectures, RAG pipelines, and evaluation frameworks for clinical decision support.
- Building **data ingestion and preprocessing pipelines** for biomedical datasets to support experimentation with AI models and healthcare analytics workflows.

Boven Technologies
Data Scientist **Jul 2019 – Dec 2023**

- Designed and **deployed machine learning models** across 5+ enterprise domains improving **decision accuracy by 15%** using predictive modeling and statistical analysis.
- Built scalable **ETL pipelines** using **Python and SQL** enabling reliable data workflows and reducing manual processing time by **60%**.
- Developed **Text-to-SQL and NLP-based solutions** for data access reducing analyst dependency by **40%** and improving data accessibility.
- Performed **feature engineering and predictive modeling** on large datasets delivering insights to **20+ senior stakeholders** to support strategic decisions.
- **Implemented data validation and quality checks** across multiple sources improving data completeness by **30%** and ensuring reliable analytics outputs.
- **Developed dashboards and reporting solutions** using **Power BI** and **Tableau** enabling business teams to monitor KPIs and make data-driven decisions.

PROJECTS

ML-Pipeline-with-PyTorch-TensorFlow-LLMs (GitHub)

- Built an **end-to-end ML pipeline** using **PyTorch, TensorFlow, and LLMs** for text classification and summarization demonstrating hands-on **GenAI solution design, prototyping, and deployment**.

A-B-Experiment-Decision-Dashboard (GitHub)

- Built a **stats-sound A/B dashboard** using Streamlit with Welch tests, bootstrap CIs, and permutation p-values generating **executive memos with automated data visualizations**.

SKILLS

Programming & ML: Python (Pandas, NumPy, Scikit-learn), PyTorch, TensorFlow, SQL, PostgreSQL, JavaScript
GenAI & LLM Systems: Large Language Models (LLMs), RAG, Agentic AI, Text-to-SQL, Prompt Engineering, Generative AI, GitHub Copilot, Cursor
Data Engineering & Cloud: AWS SageMaker, Azure ML, GCP, Data Pipelines, ETL, Databricks, Feature Engineering
Tools & Platforms: Git, OCR Integration, Power BI, Tableau, Microsoft Office
