PROFESSIONAL SUMMARY

Data/Performance Analyst with 4+ years experience compiling and analyzing data to support **strategic initiatives, variance and root-cause analysis, and forecasting/reconciliation of operational data**. Skilled in **building integrated reports, presentations, and dashboards for leadership and cross-functional stakeholders**. Proficient in **SQL, Power BI/Tableau, and Excel**. Identifies trends and process/data improvement opportunities and trains team members on analytical approaches.

ACHIEVEMENTS

"Agent-Based Artificial Intelligence in Healthcare: Applications, Challenges, and Future Trends" – Under review for MDPI Bioengineering.

EDUCATION

University of Memphis, Master of Science in Data Science

Jan 2024 – Dec 2025

Relevant Coursework: Healthcare Analytics, Statistical Modeling, Data Visualization, Business Analytics, Forecasting

EXPERIENCE

Biomedical Sensors & Systems Lab, University of Memphis

AI R&D

Feb 2026 – Present

- **Compiles and analyzes research data** to support strategic initiatives, identifying trends and reporting on operational impact to faculty leadership.
- **Performs root-cause analysis on high-variance areas** within research data, recommending focus areas and process improvements.
- **Develops integrated reports and dashboards**, ensuring data is recorded and reconciled accurately for stakeholder review.

Boven Technologies

Data Scientist

Jul 2019 – Dec 2023

- **Compiled and analyzed data across 10+ recurring workstreams** to support organizational strategic initiatives and leadership decision-making.
- **Reviewed high-variance project areas and performed root-cause analysis**, recommending focus areas that reduced recurring reporting discrepancies by ~20%.
- **Developed monthly, quarterly, and annual reports and presentations**, ensuring data accuracy through structured audits and validation checks.
- **Performed forecasting and reconciliation of internal data**, identifying trends and developments to inform business planning.
- **Engaged with business owners to scope, perform, and present analytical work**, connecting findings to broader business problems and highlighting opportunities.
- **Trained and onboarded new team members** on analytical processes and reporting tools, improving ramp-up time on new subject areas.
- **Identified and defined process and data quality improvements**, ensuring compliance with deliverable reporting requirements.

PROJECTS

A-B-Experiment-Decision-Dashboard ([GitHub](#))

- Built an **analytical decision dashboard** using Python and SQL to evaluate performance metrics, variance, and trend data supporting business recommendations.
- **Documented data definitions and reporting logic** so stakeholders could confidently interpret forecasts and variance findings.

SKILLS

Performance & Variance Analysis: Root-Cause Analysis, Forecasting & Reconciliation, Trend Analysis, KPI Development

Programming & Data: SQL, Excel (Advanced), Data Quality Audits

BI & Data Visualization: Power BI, Tableau, Dashboard & Scorecard Development

Healthcare & Operations Analytics: Healthcare Analytics Coursework, Operational Reporting, Process Improvement

Professional & Collaboration: Stakeholder Communication, Training & Onboarding, Executive Presentations
